

INSTRUCTIONS

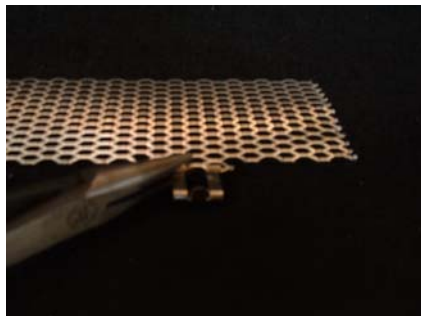

Materials needed: Grills
Needlenose Pliers

Estimated Install time: 30 Minutes

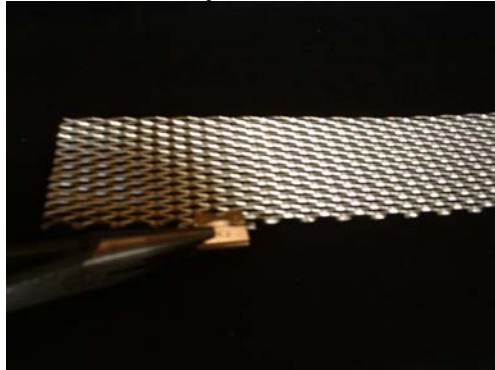

1. Read instructions before installation.
2. Assembly
 - a. Locate the clip points. Use diamond locations circled in red.

- b. Hook the two prongs on the clip around the diamonds and tighten down like so.

- c. Then tighten down the back part of the clip. If you do not tighten down enough, the clip will not hold well on the bumper. If you tighten down too much, it may be difficult to install.

- d. Repeat for other clip areas.
3. Take the grill insert and make sure you understand how it is supposed to go on. The center piece is a little longer and thinner than the outer pieces.
4. Put the grill insert behind the opening and center the grill insert and push the clips onto the existing grill. You may have to get under the car to accomplish this.
5. The clips should be near the orientation of the arrows on the first page picture.
6. Thanks and enjoy.
