Year: 2004-2012  
Make: GMC  
Model: Canyon

## INSTALLATION INSTRUCTIONS

**What's in the Box:** (1) Mesh Grill Piece, (16) Ties, (8) Clips.

**Tool List:** Wire Cutters.

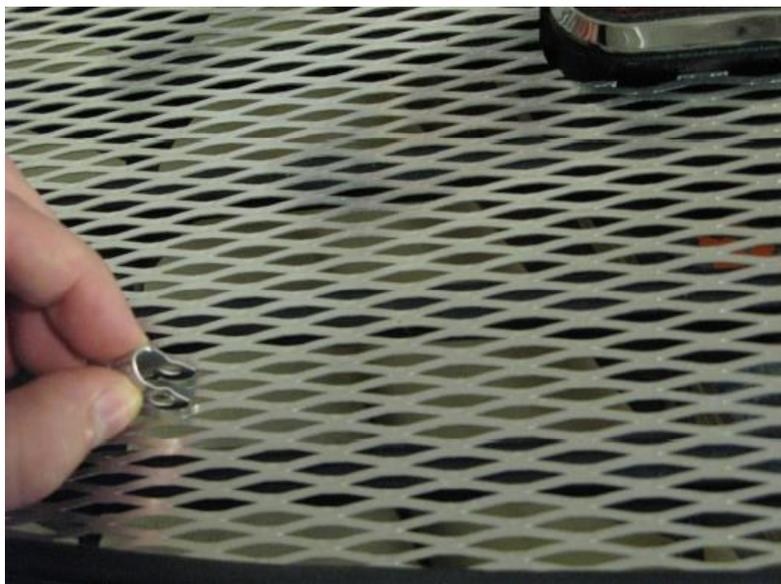

### Upper Bumper Mesh Installation:

1. Test fit the insert to ensure proper fit then open and prop the hood.
2. Loosen the top splash guard from the top of the grill area by releasing the fastening mechanisms and pull the grill assembly off the bumper, disconnecting any lighting harnesses if needed.

3. Place a clip through the mesh, near the outside perimeter of the grill. For best results, you should start from the center and work your way to the sides. You may need to straighten or bend the clip to manipulate it a way that will make it feed through properly.

The clip should straddle a diamond and also be near a horizontal bar on the factory grill.

4. Run a cable tie through the holes in the clip. The tie should straddle on of the horizontal bars.

5. The back of the grill, clip, and tie area should look like this.

6. Loosely attach the tie together allowing enough movement in the insert to lift up, in order to install more clips.

7. Repeat steps 3-6 for the rest of the insert. One problem that may arise later is that the outside driver and passenger area may bulge out a little if you do not use any clips in that area.

8. Once you have all the clips and ties in place, then pull the ties tight and cut off the ends.

9. Reattach the bumper to the vehicle and reconnect everything to the factory condition.

10. Close your hood, test to make sure the grill install is safely secure, and enjoy.

PLEASE NOTE: The instructions provided are the suggested installation method. If you feel that the installation instructions are inadequate or unsafe then please feel free to develop your own installation techniques that fit your exact needs. customcargrills.com llc is not liable for any personal or property damage resulting from our products.
