Year: 2011-2014
Make: Nissan
Model: Juke

INSTALLATION INSTRUCTIONS

What's in the Box: (3) Lower Mesh Grills, (8) Ties, Bases & Screws.

Tool List: 1/8" Drill Bit, Drill, Wire Cutters (to trim the install ties).

Lower Bumper Mesh Insert Installation:

Drill a 1/8" hole under the top of the oval 1/2" back from the front edge to feed the cable ties thru because there is not enough room for the mounting bases to stick to.

In the center of the bottom for each oval place the mounting bases (with a supplied screw in the center of the base) about 7/8" to 1" back from the front oval face.

Attach oval grill assemblies to intakes using the Tie Wraps. You'll want to position the grills in place and carefully pull on Ties until both top and bottom are secured snug. See video here: http://www.youtube.com/watch?v=dls_a5O6KkE which shows how the ties are fed through the grill to secure to the air intake ports.

PLEASE NOTE: The instructions provided are the suggested installation method. If you feel that the installation instructions are inadequate or unsafe then please feel free to develop your own installation techniques that fit your exact needs. customcargrills.com llc is not liable for any personal or property damage resulting from our products.
